Summary

Full-Stack Developer & Team Lead with hands-on experience building web platforms using React, Node.js and MongoDB across government, ed-tech and startup environments. Leads a 13-member technical team as Coding Club Head while shipping LLM-integrated tools and deployed client platforms.

SKILLS

- ❖ Languages : C, C++, Python, JavaScript , HTML , CSS
- ❖ Fullstack: React.js, Node.js, Express.js, MongoDB, REST APIs, JWT
- ❖ Tools : Git, GitHub, LLM API Integration

EDUCATION

- ❖ **B.Tech (CSE) | Amity University Punjab** (7.2 CGPA) | 2023-27

EXPERIENCE

- ❖ **Intern | India Meteorological Department, Delhi** (June 2025 – August 2025)
 - Built a full-stack web platform (React.js, Node.js, MongoDB) to manage records across departments.
 - Collaborated with IMD professionals to implement real-world software requirements.
- ❖ **Full Stack Development Intern | TPC Global** (June 2026 – August 2026)
 - Built a scalable full-stack web platform managing course, attendance, assessments and scheduling data for TPC Global's training ecosystem, supporting 4 distinct user roles: students, trainers, college moderators & admins.
 - Engineered secure REST APIs with JWT-based authentication and role-based access control using Node.js/Express , MongoDB database & developed the responsive frontend in React.js, HTML and CSS, enabling real-time visibility into courses, attendance and assessments across all user roles.

PROJECTS

- ❖ **MISHRI – AI Virtual Assistant** (Ongoing, 3+ years — currently in 4th major rebuild)

Continuously evolved from a terminal-based voice assistant into a modular AI system — adding speech recognition, LLM-based intent classification, keyboard automation, TTS and gesture control (MediaPipe/OpenCV) over successive iterations. Currently rebuilding with Google Calendar integration, MongoDB, encryption and cloud-oriented architecture.

Stack: Python, LLM API Integration, Speech Recognition, Computer Vision, TTS, MongoDB

- ❖ **LLM-Driven Terminal Automation**

[Github Repo](#)

Built an automation system using GPT-OSS-120B to convert natural language input into executable commands via a Python keyboard-control layer, achieving 80–90% execution accuracy.

Stack: Python, LLM API Integration, Keyboard Automation, Neural Networks

- ❖ **Personal Cloud Server**

[Github Repo](#)

Built a self-hosted personal cloud using a repurposed phone (256GB storage) as a server; backend exposes password-authenticated APIs for remote storage access via a custom web frontend.

Stack: Node.js, REST APIs, Authentication, HTML/CSS/JS

POSITION OF RESPONSIBILITY

- ❖ **Technical Department Head | Coding Club, Amity University Punjab** (2024 – Present)
 - Leading a technical team of 13; supervising project execution, mentorship and competency growth programs.
- ❖ **Student Placement Representative (SPR) | Placement Cell Liaison**
 - Coordinated team operations during the university HR Conclave; facilitating communication between peers and career services.

ACHIEVEMENTS / HOBBIES

- ❖ Awards: 3rd Place Finish – IGNITE IDEATHON 2025, Amity University Punjab
- ❖ Hobbies: Instrumental Music (Guitar, Flute), Badminton
